To whom it may concern:

Re: Guest Screw Products, Beechwood, NB

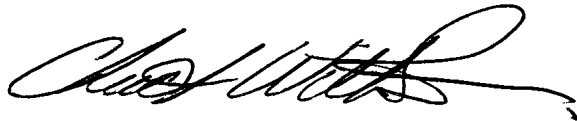

Guest Screw Machine Products has been a significant part of our supply chain for well over ten years.

As a Defence Contractor developing and manufacturing suspension systems for high-speed ground vehicles, we are a very demanding customer in terms of quality, delivery, and the technological capabilities of our supply base. With the war in the Middle East and the consequent upswing in Defence spending, our priorities change on an almost daily basis and we have to count on our Supply Chain to have the flexibility to keep up with our demands.

Despite the physical distance involved, Guest Screw Products always manages to consistently provide us with quality material against our ever-changing schedule, and not only for our production needs, but also for our small-volume prototype work, often a precursor to larger pieces of business. In the last 5 years alone, we have done upwards of \$1.5 million worth of work with Donald Guest & his company.

We would be happy to recommend Donald Guest and Guest Screw Machine Products to Systems Builders both within and without the Defence community. Please contact the undersigned if I can be of additional service.

Sincerely,  
GENERAL KINETICS ENGINEERING CORPORATION
